

# TFC Steering Committee Notes

(Send to: [tf-openci-triage@lists.trustedfirmware.org](mailto:tf-openci-triage@lists.trustedfirmware.org))

**November 29th**

**Attendees:** Glen, Don, Joanna, Anton, Scott, Dave

- TF-M release? Any issues?
  - Anton - No issues, proceeding along with the release.
  - Release is still on target.
  - Check with Paul on TFC-364
- MBed TLS Status
  - Need two things, a webhook to launch the PR jobs and any info about some timeouts we're seeing.
  - Dave - They have one test that takes a long time, but they are also fine tuning the number of tests that are run. A few PRs today will come in and we should see some changes to the timing.
  - They are close to parity on the Internal CI
  - Will get an additional update from Arthur at the end of the week.
- Priorities (from Shebu's email)
  - Boards
    - Chrome Book - Lazor / ([Asurada is up](#))
    - ST STM32MP15
    - ST STM32U5
    - Chrome Book - Tomato
    - Chrome Book - Corsola
  - MBed TLS performance
  - Misra
    - TF-A
    - TF-M
- UBLS Licensing - **Issue tabled till next meeting; Ben was not here for an update.**
  - When can this start the evaluation?
  - Additional Licenses?
- Joanna
  - Seeing some stability, timeouts on tests. The openCI runs about half the performance of the Internal CI. Joanna is looking to adjust things on their side - remove tests, change output, etc..
  - TFC-361 N1SDP
    - There appears to be some in Cambridge, would like to see if they are available and can be put in the TF rack.
    - Glen will reach out to the Lab team to see if there are boards available. After that, they will be in the backlog to get them moved.
  - TFC-365:

- Julius has requested that this be fixed. Issue with Manual rebase.  
This issue is a known issue, has a known workaround. This issue will need to have its priority raised if we want it to be resolved.
  - Release for TF-A occurred, still dependent on some of the Internal CI. These servers will be removed next year, and the next release will depend on OpenCI.
- Anton - sent mail to mailing list, the mail was blocked. Don enabled Anton as an administrator.
