TFC Steering Committee Notes

August 29th
Attendees: Glen, ben, Joanna, Olivier, Anton, Matteo
Minutes:
- Infrastructure
  - In Progress - FVPs in the Cloud & UBL license ([TFC-198](#))
    - Awaiting an update from Vishal. Paul Sokolovskyy is now able to start testing.
  - Awaiting for Lava Docker workers to update.
- TF-A / TF-M will do releases in Oct/Nov. Work in mid-September will start to increase.
  - May not get FVPs over to Tux for this set of releases. Other infrastructure changes should help with the system overload seen in the Spring release.
- TF-M CI: LAVA test getting slow ([TFC-479](#))
  - 2 MPSs are still in maintenance mode, We have found the two boards and will look to deploy them. ([STG-4884](#))
- MBedTLS
  - No issues
- [TFC-247](#) Mirror TF-M, TF-A, TS projects into GitHub
  - Patches sent; need feedback for templates from the TF-M team. anton.komlev@arm.com to follow up with Arthur's comments in the Jira Ticket.
- TF-M may have an Adhoc release 8.1; nothing is needed from the CI for this release.
- Misra
  - The team is working with Bugseng on a blog post.
  - Joanna/Olivier - they have the list of additional configurations.   We should roll these over time to ensure we don't overwhelm the servers/infrastructure.
- LTS
  - Oakash is requesting new updates for the LTS CI; the issues are under review. They will create TFC tickets when they are ready.
- Priorities
  - Paul
    - Misra TF-M / TF-A
    - FVP/UBL
  - Arthur
    - Boards - Chromebook Corsola
    - [TFC-247](#) Mirror TF-M, TF-A, TS projects into GitHub
- Open Table
  - no issues from the attendees.
