

TFC Steering Committee Meeting Minutes

(Send to: tf-openci-triage@lists.trustedfirmware.org)

June 11, 2024

Attendees: Karen, Olivier, Anton, Paul, Bence, Joanna

NOTE - Ben on vacation from June 10-21 inclusive

Minutes

- Infrastructure (FVPs in Tux)
 - TF-A
 - No issues to report post release; everything is going smoothly
 - Still in the process of upgrading models to support the switch to UBL licensing
 - Joanna asked on Discord why there are so many sandboxes in the TF-A branch
 - Paul said every time there's an LTS release, these come up and can accumulate very quickly
 - They also don't take up any usage
 - Action - Paul to respond on Discord
 - Action - Joanna to create a ticket so we can address
 - TF-M
 - No new issues; everything is working well
 - [\[TFC-615\]](#) Reminder from Anton that he would like ticket addressed in the next few weeks
 - Two tickets we can close as they are no longer required
 - [\[TFC-527\]](#)
 - [\[TFC-280\]](#)
 - MBedTLS
 - Windows executors can get stuck on part of the bring up process. If it fails it doesn't clear up.
 - Action - Bence to open up a new Jira ticket so we can address
 - Will try to finish the merge to UBL by our next meeting
 - Paul
 - [\[STG-6144\]](#) Seems like Gerrit is overloaded and getting slower. Kelly/Paul are currently looking into issue.
 - Arthur
 - Sent an email requesting feedback on the IAR Compiler Support SOW
 - With this feedback we should be able to determine how many compiler licenses we need
