TFC Steering Committee Meeting Minutes

November 19, 2024

Attendees: Karen, Joanna, Bence, Ben, Shebu, Sufyan, Olivier

Minutes

- Infrastructure (FVPs in Tux)
  - TF-A
    - No issues to report this week
    - The tree is frozen for the release; hoping to have it out by the end of this week
    - [TFC-669] LTS Maintainers would like to upstream recovered LTS proposal document - Jira
      - Govindraj mentioned in the comments he'll start working on this in December
  - TF-M
    - No issues to report this week
    - The latest TF-M release went out on Nov 4
  - MBedTLS
    - No issues to report this week
    - All tickets related to UBL licensing that were assigned to Bence have been closed
  - Ben
    - Provisioning of the IAR license server
      - Doesn't make sense for Linaro to do it, so Arm will take it over
      - Has been discussed further in another meeting

- Ben said it's nice to see that the infrastructure has been stable for some time now

- Arthur

  - Karen has asked Arthur to send out the current status on his IAR tasks to the team by mid-December at the latest

- Sufyan

  - The IAR server is required imminently

    - It makes sense for Arm to wait as they need to make sure knowledge is transferred

    - Arm would like to get a "How to Guide" on IAR (server)

      - **Action** - Ben to create (Due Date - Dec 20)

  - Arm would like to add Paul Sokolovskyy to Windows 365 through which he can access the current development in Jenkins

    - Action - Paul to provide saheer.babu@arm.com with his phone number and physical location

  - Eclair licensing

    - Ben sent Arm an entire zip file with licensing information

    - Arm has also reached out to the vendor (Bugseng) on how to set it up

    - Saheer is also trying to get a test license in place

  - New Jira tickets opened

    - TFC-683 - Access to AMIs

    - TFC-686 - Access to contents in Private S3 buckets

    - TFC-687 - Request for LAB IP CIDRs
