

TFC Steering Committee Notes

(Send to: tf-openci-triage@lists.trustedfirmware.org)

March 7th

Attendees: Glen, Ben C, Joanna, Don, Shebu, Dave, Bence

Minute:

- FYI; Paul is on holiday this week
- Infrastructure updates from Ben
 - Bought a new server, starting to deploy it. Jenkins agent is running.
 - Looking to order the Jenkins server; working on getting this configured.
 - Lava, Bullseye is in the plan for this month.
- Joanna
 - TF-A is looking good. Good results the last few nights
 - Gaps - windows build and N1SDP
 - LTS is currently being worked on by the team
- MBedTLS ([Spreadsheet](#))
 - Seeing that by removing the number of executors, performance is showing better. Ben believes this to be an anomaly and should run this more. Also, suggesting to change the timeout down for executors to end quicker.
 - Bence is looking at the parity scripts; still waiting for that to happen. Planning on working on that this week
 - Arthur is looking for the JSON file as part of the email. The issue with the mail tool, bence to send over several days of the logfile.
 - We need comparable data
- UBL Licensing
 - Ben to look into this week,
- MISRA
 - The license clock is ticking - When was the start of TF-A use? Estimate January 1.
- Priorities
 - Paul
 - LTS support: TFC-395 TF-A LTS branch regression testing planning
 - TF-M Misra w/ TF-A Misra (low-hanging fruit)
 - Shebu - This is new for TF-M; they may need to come up to speed on using TF-M. **Joanna Farley** can talk to the TF-M team.
 - Arthur
 - MbedTLS
 - Boards - Chrome Books are; Wrap up ST boards; Start on Chromebooks (Tomato & Corsola)
