- MBedTLS
  - No issues
- Ben
  - The second server we had for supporting the releases has been removed from Open CI. This process will continue into March.
  - FVP is running well with no issues
    - It's made the TF-A builds more reliable
- Arthur
  - ST Board STM32H5
    - Arthur submitted a patch to enable LAVA tests for the stm32h573i-dk board
    - Anton has merged the patch to see if the board will be stable over the next couple of days
- Paul
  - [TFC-579]
    - Just about done. Paul was looking into the creation of dedicated 2.10 build images to avoid risks experienced with 2.8
    - Discovered some technical debt with the docker image process
      - TFC-582 was created to address (open)
  - [TFC-582]
