

# TFC Steering Committee Notes

July 25th

Attendees: Paul S, Glen, Ben, Olivier, Dave R, Joanna

Minutes:

- Infrastructure
  - Lab planned limited services for July Fri 21st July 2023 05:00 BST 06:00 BST
    - No issue, Lab is back up.
  - Status of FVPs in the Cloud & UBL license
    - Available in the next week or two, then work for Paul to integrate it into the CI.
  - Many boards have been offline, moving to get them back.
- MBedTLS
  - Jenkins Master for MBedTLS (MBedTLS.trustedfirmware.org)
  - Up and running jobs, performance seems slightly better than the stage.
  - Arthur is monitoring as needed.
- Boards
  - Chrome Book Corsola - Having difficulties with unlocking the boxes. We are awaiting information from Google. New features have changed the process of unlocking and removing the battery.
- MISRA
  - Status from the TF-M team?
    - Anton - the team is to provide feedback. Paul is looking for any info on reports, false positives, etc.
    - Anton wants to review with Shebu before going public.
  - Paul: Preparing the MISRA presentation for the TF-A Tech Forum. It should provide a good introduction for the TF-M team.
  - Anton - Is it possible to do the same presentation at the TF-M? Reviewed with Don. The presentation will be recorded so, this can be available to the TF-M tech forum. If there is something different or other content, this can be discussed.
- Open Table?
  - Joanna - no issues; back from holiday. TF-A has someone to look into the Windows build. If there are any issues, Arthur can provide some support.
  - Anton - no issues.
  - Olivier - Slack channels, moving to Discord?
    - Glen to follow up with Don for details.
    - **Follow up: Setting up Discord has been requested by the Board as SLACK limits access to only ARM and Linaro; others cannot subscribe. Discord is more open. Don has set this up, but there has been no official decision to migrate off SLACK.**
- Priorities
  - Paul
    - Misra TF-M / TF-A
    - FVP
  - Arthur
    - Boards - Chromebook Corsola

- TFC-247 Mirror TF-M, TF-A, TS projects into GitHub
