TFC Steering Committee Meeting Minutes
(Send to: tf-openci-triage@lists.trustedfirmware.org)

June 4, 2024
Attendees: Karen, Anton, Joanna, Ben, Olivier, Shebu, Paul
<u>**NOTE - Ben on vacation from June 10-21 inclusive**</u>

Minutes

- Infrastructure (FVPs in Tux)
    - TF-A
        - No issues to report post release
        - Currently upgrading models to support the switch to UBL licensing
        - CI is working exceptionally well, and the team is quite happy (Great job everyone!)
    - TF-M
        - [TFC-630] has been opened and Arthur is working on it
            - Note - Ticket has since been Resolved (Thanks Arthur!)
        - For the IAR Compiler/toolchain that Arthur is also working on Anton wanted to know
            - How many licenses will we be getting?
            - Is there a minimum number we can use to run a few builds?
            - Any trial licenses?
            - Shebu added that we need to take MBedTLS into consideration as well
            - Action - Karen to follow up with Arthur
    - MBedTLS
        - Merge hasn't happened yet
        - Should be done this week
    - Paul
        - [TFC-625] Paul worked on this ticket all last week
            - Complicated ticket; can't seem to reproduce the issue
                - Note - Ticket has since been Resolved (Thanks Paul!)
        - UBL working as expected; now just waiting on Tux maintainers
        - [STG-6120] Next in Paul's queue and making changes for LTS release
    - Ben
        - Ben mentioned last week the team will need to conduct some upgrades on Gerrit, LAVA, Jenkins
        - The upgrades are currently in the Eng sprint and will have to wait until Ben returns from vacation
        - Upgrades are slow moving at the moment
        - Gerrit is now on a Kubernetes cluster and need to ensure it works there before moving to TF
