TFC Steering Committee Notes

September 5th
Attendees: Glen, Ben, Joanna, Olivier, Shebu, Dave, Bence
Minutes:

- Linaro team will be in Amsterdam for a company-wide meeting - from Sept 18th to 22nd
    - Cancel meeting for Tuesday.

- Infrastructure
    - In Progress - FVPs in the Cloud & UBL license (TFC-198)
    - Lava update 2023.08. Installed last week
    - Now, authenticating with the GitHub issue has been resolved. (TFC-428)
    - UBL license?
        - Benjamin Copeland to follow up with Paul Black for the extension to the floating license

- Joanna
    - TF-A team is doing a load test from the Austin office this weekend.   Will run 3 TF-Main runs to load up the servers.
    - We have system level, i.e., CPU, memory, and disk monitoring. Can look at the docker containers to see the queue build-up. Monitoring dashboard - here
    - The freeze date is November 7th, email will go out on October 7th

- Olivier
    - Misra/Eclair expand the configs https://linaro.atlassian.net/browse/TFC-487

- MBedTLS - No Issues

- Email from Dan Handly on a security risk with Stage
    - TFC-494 has been created and reviewed by Benjamin Copeland

- LTS
    - LTS has shared a Document on new features and has requested comments.
    - New features will be logged in Jira and prioritized.

- Paul
    - Working on TF-A MISRA configs; pushing TF-M to production
    - Reviewing LTS document.

- Arthur
    - Corsola - delivered to the Lab and currently being installed.
    - TFC-247: Github mirroring
        - Waiting for TF-M: commit templates and branch creation
        - Hafnium: commit templates
